

Dear Hiring Manager,

While still completing my degree in Web Design and Development, I was employed as a lead Front-End developer at Portlight, LLC, an ecommerce website. I played a major role in all of the company's in-house and client-side projects. I later transitioned to Visit Orlando as a Front-End developer working in ColdFusion, AngularJS, and Django environments.

I believe I can be a valuable contribution to the development team. My skills include Adobe Creative Suite, HTML, CSS (SASS), Bootstrap, Javascript, jQuery, Grunt and Git.

I am always looking for new opportunities to grow my skills. I love working in an environment where I can learn from my peers while also sharing my knowledge. I am an incredibly dedicated and hands-on developer and I look forward to hopefully joining the development team.

Thank you for your time and consideration,

Nicole Tavares Carvalho
